## Safe login without DigiD now possible thanks to Multi Factor Authentication (MFA)

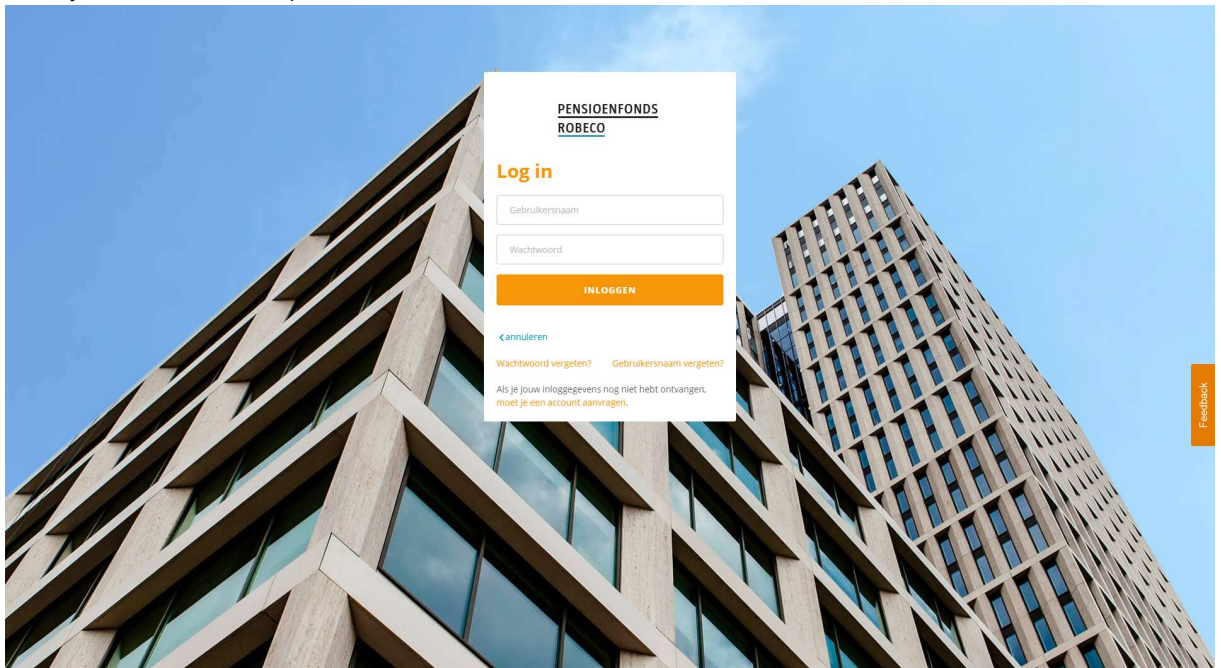

To use MFA, you need a smartphone. You will need to make a one-time link with the free MFA app: Google Authenticator.

### What you need to do?

- Have you never logged on before? Please first create an account here: <https://mijn.pensioenfondsrobeco.deelnemersportaal.nl/login>. Choose 'Inloggen zonder DigiD'. And then choose 'account aanvragen'. Then follow the steps set out below.
- Have you logged on before? Then you can still use the same user name and password, and MFA will act as additional security.

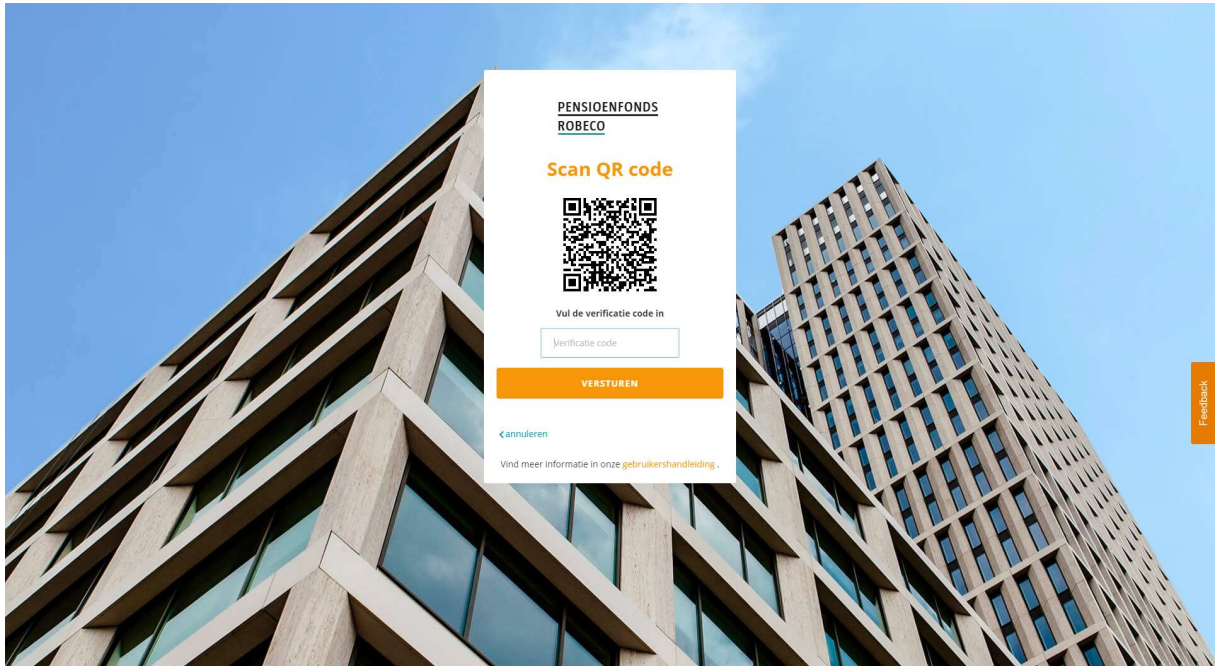

To connect your smartphone, go through the following step-by-step actions:

1. Install the free Google Authenticator\* MFA app on your smartphone.
2. Enter your user name and password on the site and click *INLOGGEN*.

3. Scan the QR code with your mobile device: a 6-digit code will pop up.

4. Enter the 6-digit code in the QR code box and click *Check password*.
5. The MFA app is now linked to your personal account. Please retain the one-time 24-digit recovery code.

From now on, this is how you log on using your smartphone:

1. Enter your user name and password on the site.
2. Open the MFA app on your smartphone; a 6-digit code will pop up.

3. Enter that code on the site and click *Login*. For the sake of security, the code will only be valid for 30 seconds. After that, a new code will pop up.
4. You are now logged on.

\* Google Authenticator is our preferred choice for the MFA app. There are also other MFA apps that you may use if you prefer.
